

An introduction to

GEDmatch

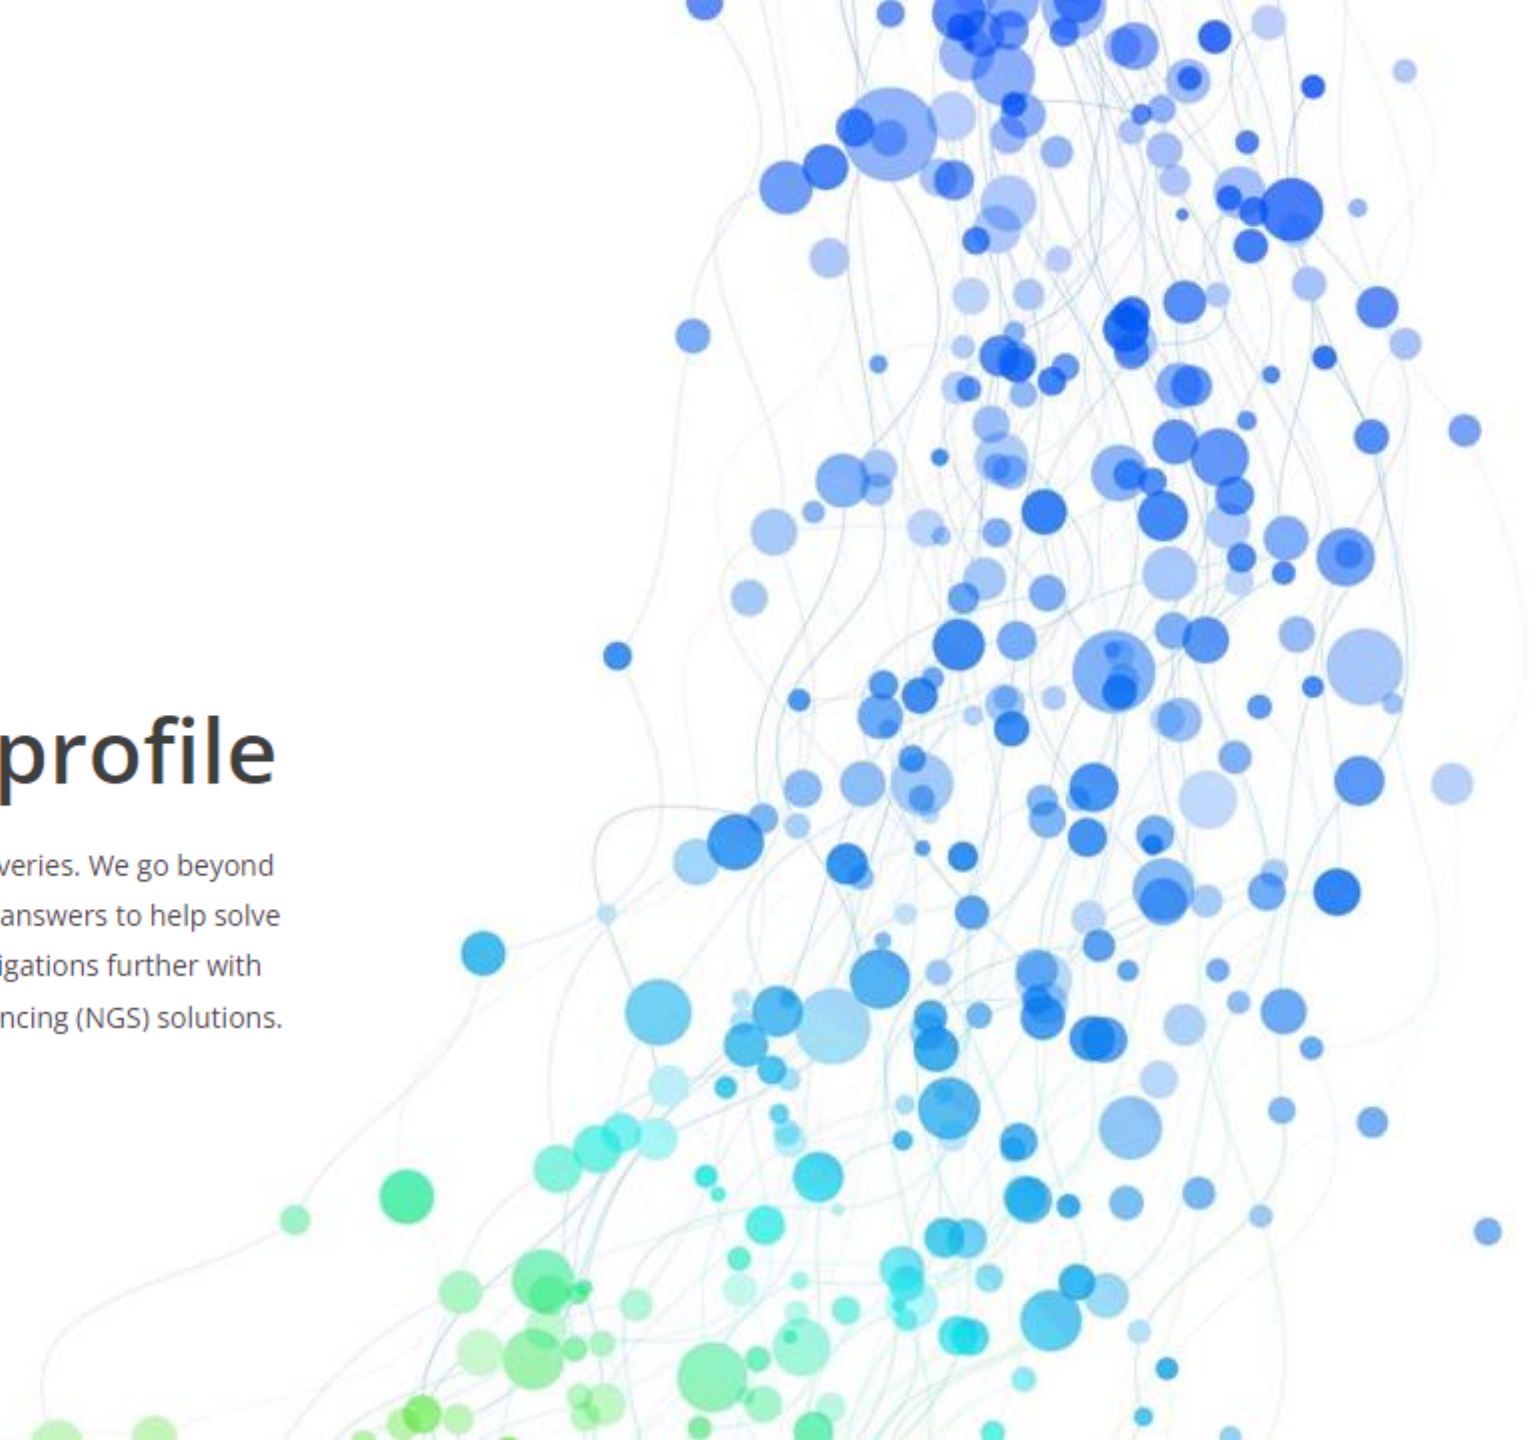

Mags Gaulden

Go **beyond** the traditional DNA profile

Welcome to the next era of human identification discoveries. We go beyond the traditional DNA profile, providing more and better answers to help solve the most complex mysteries. Take your forensic investigations further with our comprehensive portfolio of next-generation sequencing (NGS) solutions.

“GEDmatch offers a free DNA site built for genetic genealogy research. With a global database of autosomal DNA data and unmatched utility, we make this data accessible and effective.”

The background features a network of thin, light-colored lines connecting various sized circles. The circles are primarily in shades of blue and green, with some appearing as semi-transparent or overlapping. The overall effect is a complex, organic web structure that suggests connectivity and data networks.

OUR MISSION

The GEDmatch story is one of connecting people. From amateurs to professionals, genealogists, historians, researchers, and adoptees have leveraged the large pool of data on the site to build family trees, find birth families, and learn more about their DNA and by extension, their history.

Recent advancements have also allowed genetic genealogy to make communities safer by putting violent criminals behind bars and exonerating the innocent. Protecting your privacy remains the top priority, with our commitment to safeguarding your information at the foreground of every decision.

GEDmatch.com Terms of Service and Privacy Policy

Effective Date: December 30, 2021

We have updated these Terms of Service and Privacy Policy. Below is a summary of our updates:

- **Applicable privacy laws:** We made updates to include required disclosures in accordance with applicable privacy laws, including California's Genetic Information Privacy Act.
- **Payment terms:** For users who opt to use our paid services, we've updated our payment terms, including to account for our annual recurring payment plans (in addition to our monthly recurring payment plans).
- **Transparency:** We've made our terms more transparent and understandable for you. For example, we have updated the "DNA Data" section to include clarifying language regarding privacy settings consistent with the language on our DNA upload page. Note that we are not changing how your information is used or shared. Your opt-in and opt-out settings remain unchanged.
- **Location of servers:** We've updated our language to clarify that your personal data may, in the future, be hosted on EU servers in addition to U.S. servers.

New Match Notifications

In this section you can manage your New Match Notification settings for all of the kits in your account.

How often would you like to receive new match notifications?

- Daily (Tier 1 only)
- Weekly
- None, do not send me new match notifications

What threshold should we use for sending you new matches?

- 30 cM -> 4th to 5th cousins or closer (Tier 1 only)
- 70 cM -> 3rd to 4th cousins or closer (Tier 1 only)
- 100 cM -> Half 2nd cousins, 2nd cousins once removed
- 200 cM -> 2nd cousins or closer (Tier 1 only)

Delete Registration and associated DNA resources and GEDCOM resources

This page can be used to **delete all** DNA resources and GEDCOM resources.

This is permanent - if you want to use gedmatch you will have to re-register, re-upload your DNA resources and re-upload your GEDCOM resources.

If you want to only delete a particular kit use the "Your DNA resources" panel on the main page.

If you want to only delete a particular GEDCOM use the "Your GEDCOM resources" panel.

Only use this facility to delete your registration and delete all DNA resources and all GEDCOM resources.

GEDmatch DNA Resources

To proceed enter the 'Current Password' and then click 'Authenticate'.

Attribute	Value	Authenticate
Password	Current Password: <input type="password"/>	<input type="button" value="AUTHENTICATE"/>

1 Donor Information

Name of Donor (required)

Please use the DNA donor's real name here. If you don't want the real name displayed, you may also enter an alias in the box below.

Alias (optional)

If you don't want the donor's full name displayed, you may substitute an alias. Otherwise, leave this blank. If you enter an alias here, it will be shown on report pages instead of the name you entered above. The alias should either be similar to your full name, or the same as the 'screen name' that you use on forums. GEDmatch site administrators reserve the right to remove any alias that is not appropriate in their opinion.

Sex of Donor (recommended)

Male Female

What is your Mitochondrial haplogroup (optional - if known)?

What is this kit's mtDNA mitoYDNA ID (if applicable)?

Males Only (or females with a male sibling who has been tested):

What is your Y haplogroup (optional - if known)?

What is this kit's Y-DNA mitoYDNA ID (if applicable)?

Name of Testing Company, or other source

Other:

2 Raw Data to GEDmatch

When you upload Raw Data to GEDmatch, you agree that the Raw Data is one of the following, Select **one** option (required)

- Your DNA
- DNA of a person for whom you are a legal guardian
- DNA of a person who has granted you specific authorization to upload their DNA to GEDmatch
- DNA of a person whose identity is known by you and who is known to be deceased
- An artificial DNA kit
- DNA obtained from an artifact
- Anonymized sample for a donor to a large scale population study
- None of the above

Upload Your DNA

3 Privacy Options

Select one of the following privacy options for this kit (required)

Opt In

Most Popular

We will compare your DNA kit to all other kits in the GEDmatch database to find your matching genetic relatives. Kits in the database include those submitted by users undertaking personal genetic genealogy research, adoptee searches, users (including law enforcement) attempting to identify unidentified human remains, and law enforcement attempting to identify perpetrators of violent crimes. Your kit **WILL** be compared with kits submitted by law enforcement to identify perpetrators of violent crimes. The operators of GEDmatch encourage everybody to select this option.

Opt Out

We will compare your DNA kit to all other kits in the GEDmatch database to find your matching genetic relatives. Kits in the database include those submitted by users undertaking personal genetic genealogy research, adoptee searches, and users (including law enforcement) attempting to identify unidentified human remains. Your kit **WILL NOT** be compared with kits submitted by law enforcement to identify perpetrators of violent crimes.

Research

This kit will not be shown in match result reports generated for other kits. Genealogy and Genetic Genealogy require the sharing of information. This option is provided primarily for artificially created research kits, but may be used for regular uploads if you have specific reasons for doing so.

Private

This kit will not be available for any matching. The kit will be in the database, and it will be batch processed, but no comparison results will be shown unless this privacy setting is changed by you later.

Your Raw Data

Browse your data in its raw, uninterpreted format (your A's, T's, G's, and C's).* You can search for specific genes, markers, or positions of interest.

Or browse by chromosome:

Upload Your DNA

Download Raw Data

As part of your 23andMe service, we provide full access to your raw genetic data to browse or download and do with as you please. Before downloading, however, you should be aware that there are some risks that you should know about.

Important warnings to consider:

If you decide to download your raw genetic data from 23andMe, **take caution in uploading your data to any third party applications or any service outside of your 23andMe account.** These include services that offer to provide a health interpretation of your raw data, in addition to public genealogy websites.

Upload Your DNA

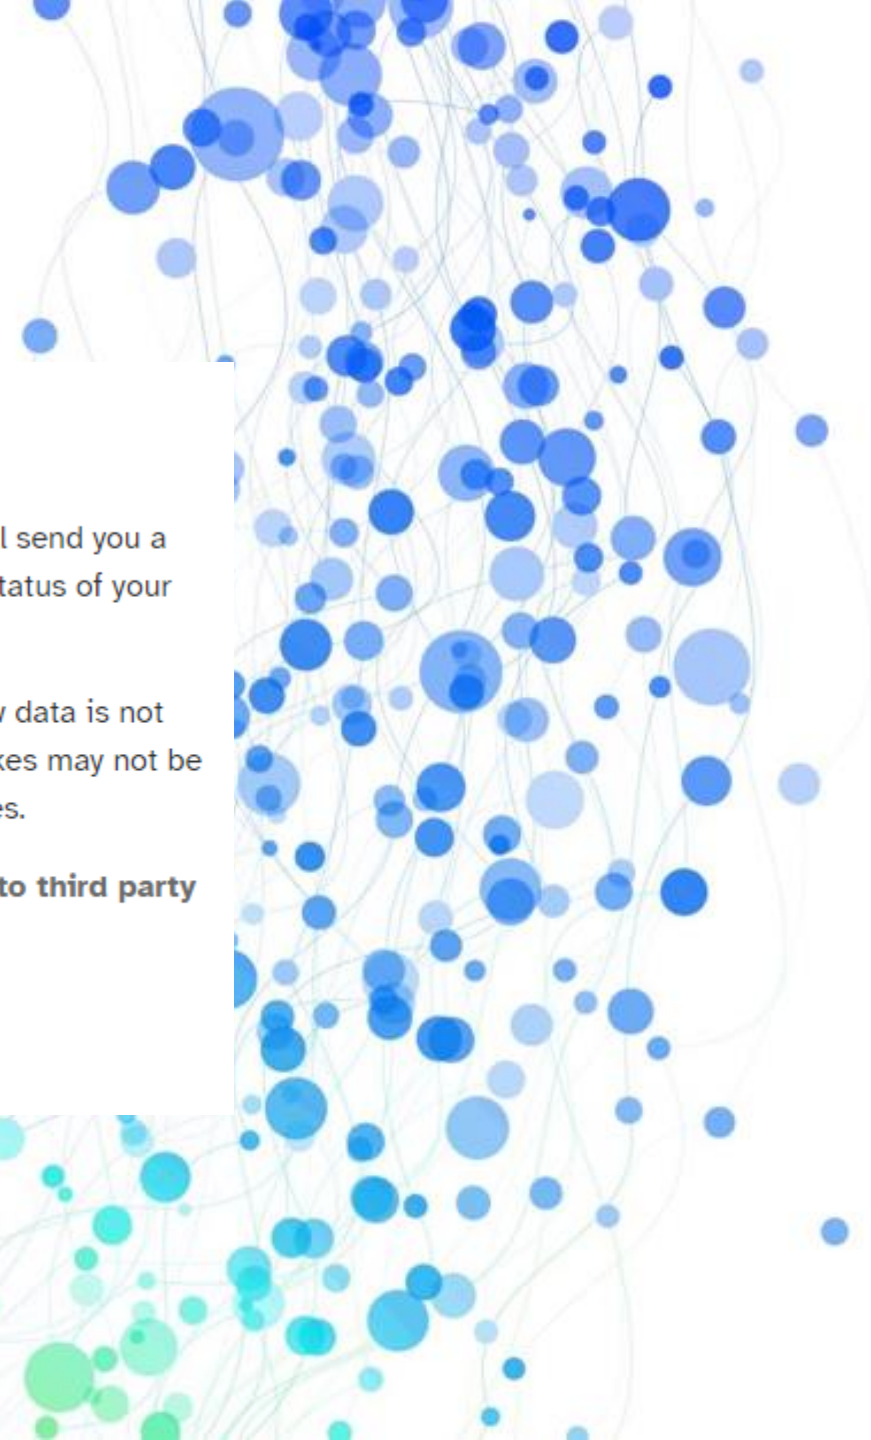

Request your raw data download

Click the link below to submit a request to download your raw data file. When it is ready, we'll send you a message to the email address linked to your account. You can also check this page for the status of your request.

If you upload your raw data to a third party application or service, keep in mind that your raw data is not validated for accuracy and the interpretation, reports or other claims that the third party makes may not be accurate. Your data also may not be maintained in a secure or private manner by third parties.

I understand the limitations and risks associated with uploading my information to third party sites.

The screenshot shows the FamilyTreeDNA website interface. At the top left is the FamilyTreeDNA logo. The navigation bar includes 'Home', 'Results & Tools' (highlighted with a green vertical bar), 'Family Tree', and 'Group Projects'. A dropdown menu is open under 'Results & Tools', listing: 'Autosomal DNA', 'Y-DNA', 'Big Y', 'Matches', 'myOrigins®', 'ancientOrigins', 'Chromosome Browser', 'Chromosome Painter', 'Matrix', and 'Download Raw Data'. On the left side, there is a 'Quick Access' section with a '+ Add Quick Links' button. Below that, a 'Family Ancestry' section features 'Autosomal DNA Results & Tools' with a description: 'See the percentage breakdown of your origins as well as you last 5 generations.' and 'Results Completed: March 9, 2016'. At the bottom, there are several notification tiles: 'Family Finder Matches' with an 'UPDATED' badge, 'myOrigins®', 'Chromosome browser', and 'Chrom'.

FAMILY FINDER - DOWNLOADS

Download Your Data

Raw Data

Read before you download: We are committed to protecting the privacy of our customers. By downloading any raw data, you hereby indicate that you are the owner of that data or have permission to download the data, and you further indicate your understanding that FamilyTreeDNA cannot in any way guarantee the security or privacy of your downloaded data. Furthermore, you understand that by uploading your raw data to a third party application and linking it to your name, FamilyTreeDNA kit number, email address, or any other identifying information, the security of your raw data and record is further put at risk and may lead to the violation of FamilyTreeDNA Privacy Policy. By downloading your raw data, you assume the liability for any breach of privacy and release FamilyTreeDNA from any privacy violation that results either directly or indirectly from the downloaded raw data and/or upload to a third party application.

The Family Finder raw data file contains your DNA results code (A, C, T, G, etc.) for each of the thousands of locations tested. It is most useful for those advanced users who wish to compare specific segments of their DNA with others. [More Info.](#)

Because they contain the results for thousands of SNPs, Family Finder autosomal DNA and X-Chromosome raw data files are large. They have been compressed for faster download. There are many free programs available on the internet for extracting GZIP files. [More Info.](#)

Tips about the one to many tool

These matches are calculated from DNA raw data files submitted by users. Results are based on the default parameters for the GEDmatch Autosomal comparison software. These results are [?]for comparison only and will likely be somewhat different than those shown by your testing company.

Default parameters (and results) may change periodically based on feedback from users, and from new research results.

Click on kit number for list of matches for that person (May take up to 5 minutes to process)
Click on the autosomal largest segment for details on Autosomal comparison.
Click on the largest segment for details on X-DNA comparison.

Intensity of **GREEN background** indicates how recent (within last 30 days) a match is.

To qualify as a 'match' in the genealogical time frame, results must have a largest Autosomal segment that has at least 700 SNPs and be at least 7 cM.

It must have BOTH. Results with the largest segment less than 7 cM are highlighted in pink. In general, the results shown below use thresholds LESS than 7cM / 700 SNPs.

PLEASE verify any result shown on this list with the one-to-one comparison tool before assuming any match is real.

To check the number of SNPs, click on the 'A' on the same line to view the one-to-one comparison detail.

Please DO NOT send emails to anyone on this list without first using the one-to-one utility to verify that it is a legitimate match.

DO NOT create mass mailing lists from these results.

Close

Validity of segments:

Significant	Blue
Moderate	Purple
Low	Pink
Insignificant	Red
Large gap between adjacent SNPs	Orange
No Match	Black

Comparing Kit UZ4085854 (*Mags Gauden) [Living DNA/FTDNA] and Kit T441204 (*D Templeton) [Migration - F2 - T]

Segment threshold size will be adjusted dynamically between 200 and 400 SNPs

Minimum segment cM to be included in total = 7.0 cM

Mismatch-bunching Limit will be adjusted dynamically to 60 percent of the segment threshold size for any given segment.
